Company Profile

The company originated as Beijing Xingzhong Weili Plastic Mould Processing Center, founded in September 1999 in Beijing. After over a decade of operation in the capital, it established a widespread market presence across regions. In response to Beijing's policy relocating manufacturing industries and attracted by Xi'an's investment promotion initiatives, the company moved to Xi'an in June 2017 with a vision to contribute to its hometown and realize its aspirations. It was reestablished as Shaanxi Hongtai Gaoxin Precision Machinery Co., Ltd., continuing its legacy in Shaanxi with more technologically advanced and human-oriented management practices, guided by the mission of "Driving Precision Industry, Delivering Customer Value."

Building on profound production experience and a rigorous quality control system, and to actively meet global market demands, we have officially launched BlissPak Packaging Co., Ltd., an international brand dedicated to thermoformed packaging. BlissPak Packaging Co., Ltd. is committed to providing high-quality, customized thermoforming packaging solutions to clients worldwide, bringing professional precision manufacturing services to the global stage.

Vacuum Forming Materials

PVC

PET

PP

APET

ABS

PS

PLA

CPET

High-barrier Material

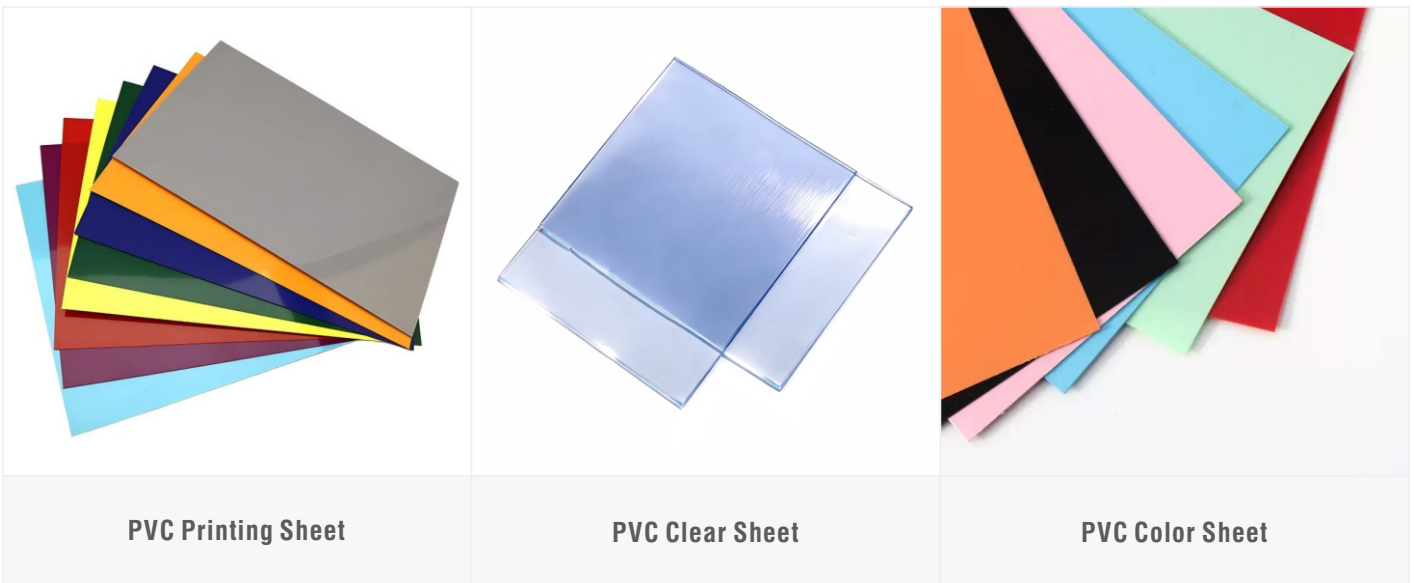

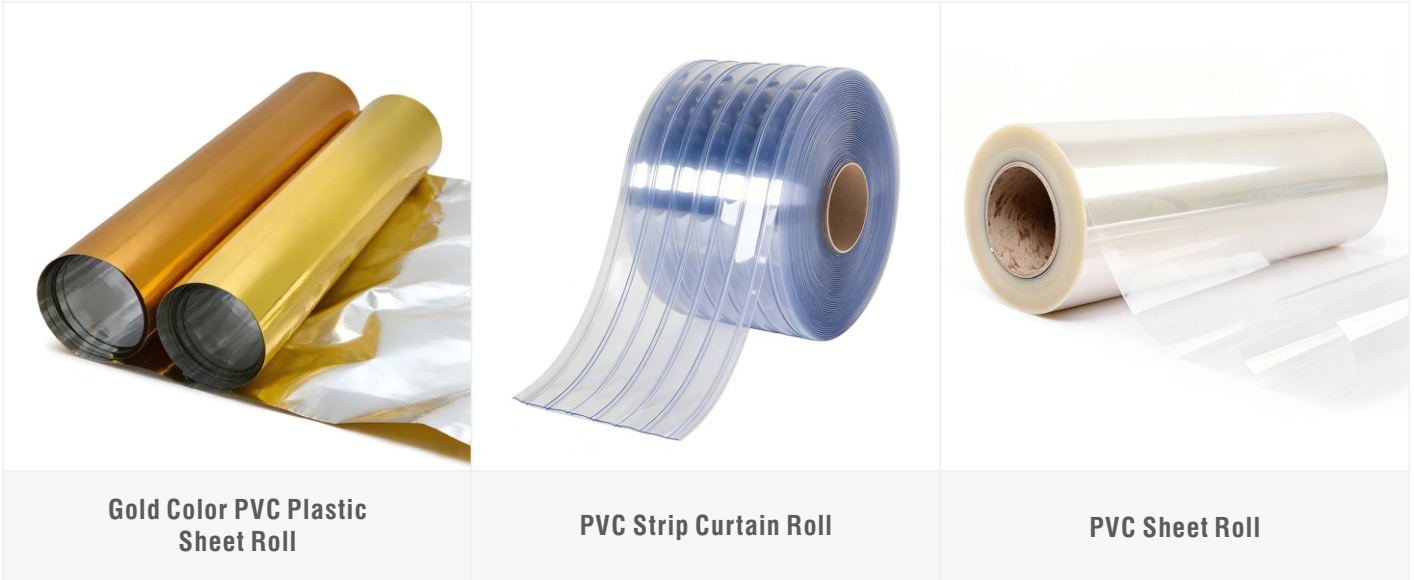

Specialty Thermoforming Materials

PVC Material

All Blister Paking Products Can Be Customized
